

That's a
Quantum
leap
forward.

TASKI
Diversey

If your floors could talk...

...what would you want them to say?

You would want them to thank you for using the Quantum™ solution from TASKI® by Diversey™, the first significant innovation in pre-wetted microfiber cleaning in a decade. The Quantum solution is engineered for the way you work and the challenges you face, making cleaning faster and easier while assuring better facility hygiene. It improves operational efficiency and productivity and reduces the total cost of cleaning.

New, dual-sided mops save time and resources

The Quantum solution includes a dual-sided microfiber mop that allows you to cover twice the area and use 50% fewer mops. It improves your operating efficiency, with significant savings in time, water, energy and detergent.

No-touch attach-and-release method

The revolutionary no-touch system attaches and releases mop heads quickly and hygienically, without Velcro® Brand* attachments that can reduce cleaning consistency and longevity. Change mops with just the flick of a wrist, reducing the risk of cross-contamination, reducing worker strain and saving time.

Consistent hygiene security, better looking floors

The microfibers are proven to remove bacteria, while color-coded options and the no-touch system help avoid cross-contamination. Use the Quantum mop with the TASKI Trolley/Mobile Work Station to customize an optimal hygiene security system for your facility.

Quantum

Unique
"no-touch"
mop release!

No more
Velcro®,
no more
problems!

All new dual-sided
mop technology!

...what would you want them to say?

You would want them to thank you for using the Quantum™ solution from TASKI® by Diversey,™ the first significant innovation in pre-wetted microfiber cleaning in a decade. The Quantum solution is engineered for the way you work and the challenges you face, making cleaning faster and easier while assuring better facility hygiene. It improves operational efficiency and productivity and reduces the total cost of cleaning.

New, dual-sided mops save time and resources

The Quantum solution includes a dual-sided microfiber mop that allows you to cover twice the area and use 50% fewer mops. It improves your operating efficiency, with significant savings in time, water, energy and detergent.

No-touch attach-and-release method

The revolutionary no-touch system attaches and releases mop heads quickly and hygienically, without Velcro® Brand* attachments that can reduce cleaning consistency and longevity. Change mops with just the flick of a wrist, reducing the risk of cross-contamination, reducing worker strain and saving time.

Consistent hygiene security, better looking floors

The microfibers are proven to remove bacteria, while color-coded options and the no-touch system help avoid cross-contamination. Use the Quantum mop with the TASKI Trolley/Mobile Work Station to customize an optimal hygiene security system for your facility.

Take a quantum leap forward in operational efficiency.

The Quantum solution goes beyond conventional pre-wetted microfiber mops. It helps improve operational efficiency and productivity, reduce the total cost of cleaning and achieve better cleaning and hygiene results. Only the Quantum solution features a no-touch method for easily and hygienically attaching and removing the dual-sided mops.

With performance microfibers and the dual-sided design, just one Quantum mop covers twice the floor area as a conventional, single-sided mop. That gives you superior cleaning and hygiene results with 50% fewer mops.

- ▶ Improve productivity, because workers need to prepare and transport fewer mops.
- ▶ Save on water, energy and detergent—and help protect the environment—by washing fewer mops.

The Quantum solution features an intuitive, no-touch attach-and-release system.

- ▶ Eliminates Velcro® Brand* attachments to improve operational efficiency and cleaning effectiveness.
- ▶ No more shrinking in the laundry.
- ▶ Mops lay flat after laundering, every time, increasing cleaning consistency.
- ▶ Mops last longer and save you money.

- ▶ Mops change from one side to the other with the flick of a wrist, and detach right into the laundry bag.
- ▶ Significantly improve worker productivity by reducing time spent changing from one mop to another.
- ▶ Improve facility hygiene and reduces cross-contamination risks by eliminating the need to touch the soiled mop head.

No-touch system reduces cross-contamination risk and improves worker productivity.

Dual sided mops cover 50% more. Mops are available for a variety of floor types.

Performance microfibers deliver superior cleaning and hygiene.

Get the Quantum solution from TASKI by Diversey, the revolutionary microfiber mop innovation that does more and saves you more.
